Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Double Patenting

Claims 1 – 5, 11 as amended and newly added claims 18 – 22 of this application conflict with claims 1 – 26 of Applications No.10/576,781 and 10/764650. 37

CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Claims 1 – 5, 11, 18 – 22 as amended and newly added are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable variously over claims 1 – 26 of copending Applications No.10/576781 or 10764650, further in view of Cosman US6675040, of record. Although the conflicting claims are not identical, they are not patentably distinct from each other because the referenced applications' claim 1 claims generally the same same six method steps as this application's claim 1 except for the intraoperative ultrasound capture however it would have been obvious in view of the latter to use ultrasound for obtaining the procedure images inter alia because it's use as an imaging mode allows patient access for other instruments.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 3768

The following art is cited as of interest:

Franck et al (US6546277) teaches production of navigational or bird's eye views using ultrasound imaging as an acquisition mode in a frame-type stereotactic surgical navigation system.

Yanof et al (US6920347) is directed to a surgical simulation planning system having stereotactic navigational aids as shown in Fig. 7.

Simon et al (US6064904) uses a navigational computer to provide real-time tracking as well as trajectory display using non-geometric representations of the target tissue.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jaworski Francis J. at telephone number 571-272-4738.
